Veterinarie**

EuroClone S.p.A, Azienda italiana parte del Gruppo EuroClone e fornitore di fiducia per i prodotti e reagenti da laboratorio dal 1983, ha il piacere di presentare la sezione AgAlive, dedicata alla Diagnostica AgroAlimentare e Veterinaria.

Nell'ambito della Diagnostica Veterinaria, EuroClone S.p.A commercializza kit ELISA e anticorpi specifici di produzione EuroClone per le principali patologie che colpiscono la specie canina, equina ed i pesci.

Oltre alle già note aziende Svanova e VMRD, produttori di kit ELISA per le principali malattie infettive e parassitarie degli animali da reddito e di una gamma completa di Reagenti per ImmunoFluorescenza per gli animali da reddito e da affezione, EuroClone ha ampliato il suo pannello di prodotti inserendo le due aziende Ingenetix e Gerbion produttrici di kit in PCR Real Time per la ricerca delle principali patologie degli animali da reddito e di affezione.

A concludere l'azienda distribuita Tridelta completa la gamma con i suoi kit per la ricerca delle proteine della fase acuta.

Come ordinare da EuroClone:

Fax: Int + 39.02.38101465

e-mail: order.bio@euroclone.it

Nell'ordine includere la descrizione completa del prodotto, il codice, il formato e la quantità.

Product Specifications: EuroClone S.p.A. garantisce che le specifiche dei prodotti sono in linea con quelle indicate nei propri cataloghi. Il materiale tecnico è disponibile su richiesta all'indirizzo mail agalive@euroclone.it
