

SCIENTIFIC CONVENTION

17-19 MARZO 2025

RIMINI - PALACONGRESSI

FONDAZIONE
Telethon

XXII
CONVENTION
SCIENTIFICA

Monday, 17th March 2025 - afternoon

10 am – 2 p.m.	<i>Registration and poster setting up</i>	
2 – 3 p.m.	Welcome and opening by Fondazione Telethon <i>Ilaria Villa - General Manager, Fondazione Telethon ETS</i>	<i>Anfiteatro</i>
3 – 4.35 p.m.	Session 1 - From genome to genes and their expression <i>Chairs: Andrea Ditadi, Anna Maria Cariboni</i>	<i>Anfiteatro</i>
3 – 4 pm	Plenary talks	
3.00 – 3.20	Sestrin2 drives ER-phagy in response to protein misfolding <i>Chiara De Leonibus - Telethon Institute of Genetics and Medicine (Pozzuoli)</i>	
3.20 – 3.40	Regulation of gene expression at the level of translation: unexpected checkpoints and future perspectives <i>Stefano Biffo – University of Milan & INGM (Milan)</i>	
3.40 – 4.00	Brain organoids modelling of hormonal impact on neurodevelopment to unravel the molecular basis of Congenital Adrenal Hyperplasia neuropsychiatric symptoms <i>Nicolò Caporale - University of Milan, Human Technopole (Milan)</i>	
4.00 – 4.20	Flash presentations <ul style="list-style-type: none"> • <u>Anna Maria Gambetta</u>, University of Padua - Genome-wide screening in pluripotent cells identifies novel suppressors of mutant huntingtin toxicity • <u>Carlo Giaccari</u>, CNR - IGB (Naples) - Exploring the role of the maternal-effect Padi6 gene in early mouse embryogenesis • <u>Luca Frosio</u>, San Raffaele Telethon Institute for Gene Therapy (Milan) - Mitotic kinase Aurora B control interferon responses in macrophages via histone phosphorylation • <u>Leandro Soria</u>, Telethon Institute of Genetics and Medicine (Pozzuoli) - Impaired nuclear glycogen metabolism affects liver homeostasis in Argininosuccinic aciduria • <u>Martina Zobel</u>, University of Milan - DNA as driver of its own instability within the Huntington's disease locus • <u>Samuele Crotti</u>, University of Modena and Reggio Emilia - Boosting HSPB3 to prevent neuromuscular degeneration in peripheral neuropathies 	
4.20 – 4.35	NEGEDIA – sponsored flash talk Bridging Advanced Sequencing Technology and Clinical Diagnostics: Unlocking the Next Generation of Medicine <i>Beatrice Salvatori, Scientist and Project Manager Negedia</i>	
4.35 – 5.20 p.m.	Keynote Lecture <i>Chair: Leopoldo Staiano</i> Applications of human brain organogenesis <i>Alysson R. Muotri - UC San Diego, CA</i>	<i>Anfiteatro</i>
5.30 – 7.30 pm	Coffee break & Poster Session 1 <i>Scientists and Patient Association Representatives</i>	<i>Sala della Piazza</i>
7.30 pm	Il Ritmo della Ricerca - cena romagnola e galà <i>Entertainment by the Raoul & Swing Orchestra</i>	<i>Foyer Domus</i>

Tuesday, 18th March 2025 - morning

8.30 – 9 am	<i>Registration and poster setting up</i>	
9 – 10.30 am	Session 2 - Editing strategies for rare diseases <i>Chairs: Anna Cereseto, Angelo Lombardo</i>	<i>Anfiteatro</i>
9 – 10 am	Plenary talks	
9.00 – 9.20	Towards one-and-done gene therapies for defect of hepatic metabolism in pediatric patients <i>Alessio Cantore - San Raffaele - Telethon Institute for Gene Therapy (Milan)</i>	
9.20 – 9.40	Towards customized allele-specific CRISPR/Cas gene editing for the treatment of ocular surface disorder in EEC syndrome <i>Laura De Rosa - University of Modena and Reggio Emilia</i>	
9.40 – 10.00	Mutation-independent genome editing approaches for treatment of Stargardt disease <i>Ivana Trapani - Telethon Institute of Genetics and Medicine (Pozzuoli)</i>	
10.00 – 10.15	SIAL Srl – sponsored flash talk Genome of Europe: building an unbiased genome reference across Europe for improving precision medicine <i>Graziano Pesole, Università degli Studi di Bari “A. Moro”</i>	
10.15 – 10.30	Flash presentations <ul style="list-style-type: none"> • <u>Fanny Jaudon</u>, University of Trieste - New genome editing strategies for episodic ataxia and absence epilepsy: Optimizing splice isoforms for enhanced calcium channel function • <u>Federico Midena</u>, San Raffaele - Telethon Institute for Gene Therapy (Milan) - Tridimensional scaffolds enable efficient and safe genetic engineering of hematopoietic stem and progenitor cells across multiple gene therapy platforms • <u>Agnese Padula</u>, Telethon Institute of Genetics and Medicine (Pozzuoli) - Copper-mediated DNA damage influences AAV integration profiles in gene therapy and genome editing for Wilson disease • <u>Martino Cappelluti</u>, San Raffaele - Telethon Institute for Gene Therapy (Milan) - Allele-selective silencing of the mutant Huntingtin gene by epigenetic editing for the treatment of Huntington's Disease • <u>Martina Orefice</u>, University of Pisa - Modeling Pitt-Hopkins syndrome and new pathogenetic variants of TCF4 by gene editing: a step forward toward precision medicine 	
10.30 – 11.15 am	Coffee Break	<i>Sala della Piazza</i>
11.15 a.m. – 12 pm	Keynote Lecture <i>Chair: Anna Cereseto</i> Genome Editing by Homology Directed Repair (HDR) to Create Stem Cell Based Drugs <i>Matthew Porteus - Stanford University (CA)</i>	
12 p.m. – 1 p.m.	From project to product: how can a scientist trigger pharma interaction? <i>Round Table - Chair: Valentina Vavassori</i> <i>Irene Manfredi, ADV IP Srl</i> <i>Alberto Auricchio, Tigem Scientific Director</i> <i>Luigi Naldini, SR-Tiget Scientific Director</i> <i>Samuele Ferrari, Project Leader at SR-Tiget</i>	
1 – 2.20 p.m.	Lunch buffet <i>Enjoy lunch and see you at 2.30 p.m. in Anfiteatro...sharp!</i>	<i>Foyer Domus</i>

Tuesday, 18th March 2025 – afternoon

2.30 – 3.30 p.m.	Session 3 - Fondazione Telethon Strategies and challenges in biomedical research for rare diseases	<i>Anfiteatro</i>
3.30 – 5.30 p.m.	Session 4 - Mitochondrial biology <i>Chair: Giorgio Casari</i>	<i>Anfiteatro</i>
3.30 – 4.40	Plenary talks	
3.30 – 4.00	A mitochondrial therapy for muscular dystrophies <i>Paolo Bernardi, University of Padua</i>	
4.00 – 4.20	Posterior Column Ataxia and Retinitis Pigmentosa: new pathogenetic insights from the study of mitochondria-associated membranes <i>Deborah Chiabrando, University of Turin</i>	
4.20 – 4.40	Dysregulation of lipid droplet dynamics induces mitochondrial stress and promotes fibrosis, driving the progression of chronic kidney disease in Lowe syndrome <i>Leopoldo Staiano, Telethon Institute of Genetics and Medicine (Pozzuoli)</i>	
4.45 – 5.00	EUROCLONE – sponsored flash talk Innovative solutions for protein detection in Spatial Biology and in Single Cell Analysis <i>Maxime Jacquet, Field Application Scientists EMEA, Cell Signaling Technology</i>	
5.00 – 5.15	Flash presentations <ul style="list-style-type: none"> • <u>Michael Donadon</u>, University of Padua - Exploiting redox-active molecules against mitochondrial diseases linked to complex III and complex I dysfunction • <u>Iva Cantando</u>, University of Rome “La Sapienza” - Mitochondrial dysfunctions in 22q11 Deletion Syndrome: a novel target for therapeutic intervention • <u>Lucia Iannotta</u>, CNR - Neuroscience Institute (Milan) - Uncovering VPS13D's function to understand SCAR4 pathogenesis • <u>Silvia Sighinolfi</u> San Raffaele - Telethon Institute for Gene Therapy (Milan) - Intracellular Iron Overload rewires HSC metabolism by impairing mitochondrial fitness in β-thalassemia • <u>Erica Tagliatti</u>, Humanitas University (Milan) - Microglial NHD Trem2 gene controls neuronal metabolism and synapses during development 	
5.30 – 7.30 p.m.	Coffee break & Poster Session 2	<i>Sala della Piazza</i>

Wednesday, 19th March 2025 – morning

9 – 10.30 a.m.	Session 5 - RNA technologies for therapy development <i>Chairs: Marco Sandri, Laura Cancedda</i>	<i>Anfiteatro</i>
9.00 – 10.00	Plenary talks	
9.00 – 9.20	A new RNA-based therapy for the Fragile X Syndrome <i>Claudia Bagni, University of Rome "Tor Vergata"</i>	
9.20 – 9.40	mRNA-replacement therapy for Glycogen Storage Disease type 1b <i>Lucia De Stefano, Telethon Institute of Genetic and Medicine (Pozzuoli)</i>	
9.40 – 10.00	Developing a strategy to target AR coactivators in preclinical models of SBMA <i>Manuela Basso, University of Trento</i>	
10.00 – 10.15	PRODOTTI GIANNI – sponsored flash talk New Generation Drug Delivery Systems: intracellular uptake and trafficking studies <i>Barbara Canonico, Professor at University of Urbino Carlo Bo</i>	
10.15 – 10.30	Flash presentations <ul style="list-style-type: none"> • <u>Alessia Oppizzo</u>, IFOM ETS (Milan) - Selective control of DNA damage response at telomeres as an innovative therapeutic approach for Dyskeratosis Congenita • <u>Roberta Benfante</u>, National Research Council (Milan) - The natural antisense lncRNA PHOX2B-AS1 in the pathogenesis and as potential drug target in Congenital Central Hypoventilation Syndrome (CCHS) • <u>Roberto Oleari</u>, University of Milan - Combining spatial and gene transcriptomics to reveal NKTR as nuclear splicing protein implicated in head development and in a novel spliceosomopathy • <u>Dalila Capasso</u>, Telethon Institute of Genetic and Medicine (Pozzuoli) - Gaining insight into the role of noncoding RNAs in Inherited Retinal Disease by RNA-seq-based approaches 	
10.30 – 11.30 a.m.	Coffee break <i>with take-away</i>	<i>Sala della Piazza</i>
11.30 – 12.45 p.m.	Session 6 - Innovative therapeutic approaches <i>Chairs: Maria Pennuto, Elena Cattaneo</i>	<i>Anfiteatro</i>
11.30 – 12.30	Plenary talks	
11.30 – 11.50	A membrane-targeted photoswitch restores physiological ON/OFF responses to light in the degenerate retina <i>Fabio Benfenati, Italian Institute of Technology (Genova)</i>	
11.50 – 12.10	A Pipeline for drug discovery in Lowe Syndrome <i>Antonella De Matteis, Telethon Institute of Genetics and Medicine (Pozzuoli)</i>	
12.10 – 12.30	Classification and rescue of HCN1 mutations in EIEE patients <i>Anna Moroni, University of Milan</i>	
12.30 – 12.45	Flash presentations <ul style="list-style-type: none"> • <u>Francesco Gentile</u>, Università Vita-Salute San Raffaele (Milan) - Genetic and pharmacologic modulation of the ATF6 UPR-related pathway affect disease pathogenesis in mice models of CMT1B • <u>Angela Della Sala</u>, University of Torino - Rescue of Mutant CFTR Chloride Channels by a Mimetic Peptide Targeting the A-Kinase Anchoring Function of PI3Kγ • <u>Sandro Montefusco</u>, Telethon Institute of Genetics and Medicine (Pozzuoli) - Combining phenotypic high-content imaging with the repurposing of drugs to tackle lysosomal storage disorders • <u>Enrica Federti</u>, University of Verona - Resolvin D1 protects against sickle cell related inflammatory cardiomyopathy in humanized mice • <u>Nicole Innocenti</u>, University of Trento - Targeting the undruggable: chemical exploration of a prion protein degrader compound 	
12.45 – 13.10 p.m.	Late Breaking News	<i>Anfiteatro</i>
13.10 – 13.15 p.m.	Closing	<i>Anfiteatro</i>
